## FINISSAGGIO

Per esaltare al meglio le naturali caratteristiche del cashmere consigliamo una leggera follatura in acqua a 35°C per 2-3 minuti con ammorbidente al 2-3% sul peso della merce. Stirare con abbondante vapore.

Si possono tingere tutti i colori uniti delle cartelle stagionali e colori a richiesta.

I colori con effetto sablé proposti su questa cartella devono essere considerati a titolo indicativo, in quanto la loro riproduzione può variare a seconda della composizione del filo sul quale gli stessi vengono tinti. E' bene pertanto tenere in considerazione che non siamo sempre in grado di garantire una perfetta e fedele riproduzione del colore rispetto al campione di riferimento.

## FINISHING

To enhance the natural softness of cashmere, we suggest light milling in water at 35°C (95°F) for 2-3 minutes with a softener at 2-3% on the garment weight. Generous steaming is recommended.

All solid colours from our seasonal colour cards as well as custom-made colours can be dyed.

The sablé colours displayed in this colour card have to be considered as an indication, as their reproduction can vary depending on the composition of the yarn (on which they are dyed). Therefore, please note that we are not always able to guarantee a perfect and faithful colour reproduction.
