FINISSAGGIO

Stirando con abbondante vapore si ottiene un ottimo aspetto della maglia. Per esaltare al meglio la sofficietà e la gonfiezza del filato si consiglia una leggera follatura in acqua per 3-5 minuti con ammorbidente al 2-3% sul peso merce, ad una temperatura non superiore a 35°C. Centrifugare. Asciugare in tumbler avendo cura di non essiccare troppo.

FINISHING

A good pressing with steam will give the garment an excellent appearance. To enhance softness and bulkiness of the yarn, we suggest a light milling for 3-5 minutes in water using a wool-softener in ratio of 2-3% of the garment's weight, at a maximum temperature of 35°C. Centrifuge. Tumble-dry without over-drying.
