FINISHING

A normal pressing with a lot of steam will give an excellent regular effect. To enhance softness and bulkiness of the yarn, we suggest a light milling for 3-5 minutes in water using a wool softener in the ratio of 2-3% of the garment's weight, at a temperature of less than 35°C.

After milling, centrifuge and tumbler dry at a temperature around 80° C for 15 Minutes. Avoid overdrying garments, press with a lot of steam.

FINISHING

Normal pressing with a lot of steam will give an excellent regular effect. To enhance softness and bulkiness of the yarn, we suggest light milling for 3-5 minutes in water using a wool softener in the ratio of 2-3% of the garment's weight, at a temperature of less than 35° c.

After milling, centrifuge and tumbler dry at a temperature around 80° c for 15 minutes.

Avoid overdrying garments, press with a lot of steam.

FINISSAGGIO

Con un semplice stiro e con abbondante vaporizzo si ottiene un ottimo aspetto della maglia.

Per esaltare al meglio la soffici ta e la gonfiezza del filato si consiglia una leggera follatura in acqua per 3-5 minuti con ammorbidente al 2-3% sul peso della merce, ad una temperatura non superiore a 35° gradi.

Centrifugare, asciugare in tumbler a 80° gradi in 15 minuti senza essiccare. Finire stirando con abbondante vapore.

FINISHING

A normal pressing with a lot of steam will give an excellent regular effect. To enhance softness and bulkiness of the yarn, we suggest a light milling for 3-5 minutes in water using a wool softener in the ratio of 2-3% of the garment's weight, at a temperature of less than 35° c.

After milling, centrifuge and tumbler dry at a temperature around 80° c for 15 minutes.

Avoid overdrying garments, press with a lot of steam.
