Nm. 1/15000 - Nm. 2/15000
100% (WV) lana baby merino extrafine

IMPIEGO

Rettilinea finezza 12	Cotton 21 gg	1 Capo
Rettilinea finezza 7	Cotton 12 gg	2 Capi

FINISSAGGIO

Consigliamo di immergere i capi, a rovescio, in acqua con durezza inferiore a 5° francesi, PH 5.5, la cui temperatura non superi i 30° C. Il rapporto bagno sarà 20/1 (pari a 20 litri di acqua per ogni chilo di materiale).

Lavate con sapone follante, risciacquate, scaricate l'acqua e lavate di nuovo con poco ammorbidente se lo ritenete necessario (non oltre l'1,5% sul peso dei capi, compatibilmente con il tipo di ammorbidente utilizzato).

Centrifugate un minuto o più, per eliminare tutta l'acqua. Estrarre subito e distendere bene le maglie per evitare di rendere le pieghe permanenti.

Asciugate brevemente in tumbler ad una temperatura che non oltrepassi i 70°C.

Colori diversi necessitano tempi di follatura diversi e pertanto non possono essere trattati congiuntamente; maglie di identico colore ma lavorate su macchine di diversa finezza devono essere follate separatamente.

Poiché il risultato finale viene sensibilmente influenzato dalla fittezza del capo e dal tipo di materiale utilizzato, è necessario effettuare prove che determinino le tempistiche da adottare.

STOCK SERVICE

Tutti i colori sono Stock Service. Il minimo ordinabile è di una scatola per colore.

Il colore 840902 (bianco naturale) utilizzabile anche per tinto capo è da considerarsi in stock service anche se non è presente in cartella.

N.B.

I colori di questa cartella possono essere ordinati anche in Nm. 3/15000.

Date le caratteristiche del filo, consigliamo di lavorarlo utilizzando due o più guidafilili.

SOLIDITÀ COLORI

Rispondenti alle norme Woolmark.

Per uso in rigato con colori contrastanti richiedere solidità specifica per rigatura.

100% (WV) baby extrafine merino wool

KNITTING

Flat machine 12	Cotton 21 gg	1 Ply
Flat machine 7	Cotton 12 gg	2 Ply

FINISHING

We recommend to soak the garments on their reverse side in water, the hardness of which is equal or below 5° french, PH 5.5 and temperature not over 30°C. Bath ratio must be 20/1 (20 liters of water per kilogram of garments).

Wash with milling soap, rinse, drain and wash again adding a small amount of softener, if you like it (not over 1,5% on the garment weight, depending on the type of softener used).

Spin-dry the garments for one minute or more in order to reduce the amount of water.

Lay the garments flat in order to avoid creases.

Tumble dry briefly at 70°C max.

Different colours require different finishing time and cannot be washed together; garments having the same colour but being knitted on different gauge/needle must be washed separately.

The final result is very much affected by the stitch length and by the type of machine used; it is thus very important to test the duration of finishing, in order to achieve the expected handfeel.

STOCK SERVICE

All colors are in Stock Service. The minimum quantity to be ordered is one box each colour.

Colour 840902 (natural white), that can also be used for garment dye, must be considered in stock service, even if it does not appear on this colour card.

N.B.

All colours can be also ordered in Nm. 3/15.000.

In order to get the best from the yarn, we suggest to knit it using two or several feeders. 

COLOURS FASTNESS

Woolmark standards.

In case of striped or contrast knitwear a specific dyeing fastness must be asked.
